Georgia River Network is the only statewide non-profit environmental organization solely dedicated to the conservation of Georgia's waters. GRN fulfills a unique role within the conservation community by building and supporting local watershed groups and individuals as well as working with regional and national partners to improve water policies in our state. We also partner with other organizations to provide educational training opportunities.

Georgia River Network is classified by the U.S. Internal Revenue Service as a 501(c)3 non-profit organization. Contributions are fully tax-deductible.
